

**Who has ultimate control
of your network?**

Are you sure?

Call Cognetic Networks and be absolutely sure.

A data attack is not the time to find out that your network is vulnerable. Find out now, with Cognetic Networks. We'll perform a Network Vulnerability Assessment Scan to find out where your security may be penetrable. We understand how attackers think. We probe your system from every direction, much as they would. So we can uncover the most minuscule vulnerabilities before they do.

You'll get a detailed report that identifies network weaknesses, evaluates your susceptibility to attack and assesses potential consequences of this exposure. We also offer services to fix these problems and fortify your entire security system. We believe the best defense is a good offense. Attack the attackers – with Cognetic Networks. Call 713-267-7348.
